DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-14, drawn to group I, classified in class 370, subclass 389.

II. Claims 15-24, 26-29, drawn to group II, classified in class 370, subclass 474.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions the invention of group I is directed towards an apparatus that includes a plurality of components wherein the components maintain an indication of the subdivided packets that are stored in other components

The invention of group II is mainly directed towards a method for receiving an indication of a second set of a plurality of packets received by a second component.

Art Unit: 2661

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
